Packaging: Standard can sizes are: 50, 100, 125, 150, 200 and 250 ml. Individual carton boxes, with or without leaflets are also available. Pre-printed cans.

The silicone medical adhesive remover (SMAR) from Aurena Laboratories gently and painlessly removes adhesive products, such as stoma pouches and wound dressings.

The aerosol is free of preservatives, does not sting on application and preserves skin integrity.

Frequently removing medical adhesive devices from the skin creates untoward effects on the skin, as layer by layer of the stratum corneum (the superficial layer of the skin) is stripped off. The result is a reduced barrier function and inflammation of the skin. This is particularly a problem for stoma patients, among others, who change their device repeatedly during the day.

Medical Adhesive Remover Spray makes the removal of the device more skin friendly by avoiding skin stripping and thereby avoiding loss of natural functions of the skin. Thus, pain is reduced, cost of care is less and quality of life of patients is increased. The silicone based medical adhesive also enables continued use of devices fastened on the skin and thereby concordance with suggested care.

Intended use:
To prevent skin stripping and to ease removal of medical adhesives from the skin surfaces. Can be used for all ages.

Clinical claims:

• Removes devices with medical adhesives attached to skin
• Doesn't sting on application
• Preserves skin integrity when removing adhesive devices

Product characteristics:

• Non-contact application
• Preservative free
• Can be used at any angle
• 36 months shelf life
